PROFESSIONAL EXPERTISE

OUR EXPERTS HAVE PLANNED AND STARTED
THE PROJECT FOR YOU

INSIDE THE PACKAGE:

LEARNING:

Training programs right on your computer

The package provides you with **five training courses** with over 8 hours of training, covering:

- SQF 2000 Certification Basics,
- Understanding SQF 2000
- Principles of HACCP
- Prerequisite Programs
- Internal Auditing- with interactive practice audit

Each program is just a click away from your main page, runs directly on your PC with audio, slides and a final test. When you pass the test you are able to print a training certificate. Revisit the training anytime you need to refresh your knowledge.

The training programs are perfect for meeting the training requirements for your SQF Practitioner Training.

IMPLEMENTING:

Tutorials, task lists and templates

- ▶ Implementing an SQF 2000 Food Safety Management System (FSMS) requires that you design and implement processes throughout your organization to manage all aspects of product safety. Use our documented processes as a foundation for your system.
- ▶ The All-in-One provides you with documented procedures for effective, compliant processes covering all of the requirements of the standard. A tutorial for each procedure explains the process and how to customize it for your organization. All related forms are included.
- ▶ Task lists for implementation of each procedure ensures that the process is effectively implemented and becomes more than just a document, but a fully operational process effectively integrated into your daily operations.
- ▶ Project Planning guidance is provided with a project plan template complete with tasks and a Gap Analysis tutorial to assist you in planning and conducting a Gap Analysis to get your project started.
- ▶ All documents are easily opened directly from the program and ready to save on your computer as your own.

TEMPLATES:

Procedures: Management Responsibility, Document Control and Records, Specifications, Food Safety Fundamentals, Food Safety Plan, Incoming Goods and Services, Corrections and Corrective Action, Control of Nonconforming Product and Equipment, Rework, Finished Product Release, Validation and Verification, Product Sampling Inspection and Analysis, Internal Audits, Product Identification Trace and Recall, Site Security and Emergency Preparedness, 15 Related Tutorials
